

# Pure Water Anywhere, Anytime.

Reliable Marine  
Water makers  
& RO Systems

# Superior RO Technology for Harsh Marine Environments

Aquaunits brings engineering excellence to your vessel. Our systems are designed to handle the salinity of the Mediterranean and challenging conditions of the North Sea with ease.

## Energy Efficient

Water maker systems deliver maximum water production with low energy consumption, thanks to high-efficiency pumps and intelligent drive technology.

## Compact Design

A space-saving compact design enables easy installation in limited spaces while ensuring efficient, quiet, and reliable operation.

## Support

With a strong sales and service presence throughout Europe and beyond, we are always here to support you

### 12/24 V Models

Compact desalination units designed for small-sized boats, capable of producing an average of 30 or 60 liters of fresh water per hour. Their biggest advantage is that they operate on 12 or 24 Volts, allowing them to run directly from the battery without requiring a generator.

Models	Production (Lt/day)	Pressure (bar)
DC 30	720	12-14
DC 60	1.440	12-14

### Smart /ECO Models

The economic models designed for small, medium and large-sized boats, capable of producing an average of 100-600 liters of fresh water per hour. Since it is a short-membrane model, it can be installed either in separate sections or as a compact unit without occupying much space on small and medium-sized boats.

Models	Production (Lt/day)	Pressure (bar)
Small & Medium	1.680 - 3.600	58
Medium & Large	3.600 - 14.400	58

### Dual Model

This model is designed for large vessels and consists of a dual system, each unit capable of producing 400 liters of fresh water per hour. With independent operation capability, each unit can run separately, providing full redundancy. When operated together, the system can produce up to 800 liters of fresh water per hour.

Models	Production (Lt/day)	Pressure (bar)
400 PRO +	9.600	58

# We Support You Wherever You Sail.

Global Reach, Local Support

Choosing Aquaunits means more than just buying a machine. You gain access to extensive service network across Europe, the Middle East and Turkiye.
